

Carpentaria Gas Pipeline

Spare Capacity Register

The Carpentaria Gas Pipeline is a Covered Pipeline subject to light regulation. Indicative terms and conditions posted on APA's website relate to a Firm service between Ballera and Mt Isa.

Carpentaria Gas Pipeline Spare Capacity Register

There is currently Firm capacity available on the pipeline as per the following table.

Receipt Point	Delivery Point	Current Spare Capacity (Firm Capacity in TJ/day)	When will capacity be available?
Ballera	Mount Isa	7 TJ/day	7 TJ/day is currently available. Approximately 20 TJ/day will become available in 2017 due to contract expiry.

Availability of alternative services

Pipeline capacity may be available for the provision of services other than a Firm service between Ballera and Mt Isa. These services may include, but are not limited to:

- Services to delivery points other than Mt Isa;
- Interruptible and "As Available" services.

The availability of these services is dependent on the specific circumstances in which they are required.

Information provided by users on unutilised contracted capacity

Users of the Pipeline have not provided APA with information on the availability of unutilised contracted capacity.

Future expansions of the pipeline

An expansion of the Carpentaria Gas Pipeline was completed in June 2009. No further expansions are currently planned, however if a shipper sought additional capacity APA would review options for further expansion on a case by case basis.

Contact

APA's Commercial team would welcome the opportunity to discuss your requirements and how we may be able to meet them. Please contact us on 07 3323 6027.
